

Candidacy for ESCCA Board membership, elections 2025

Prof. Florian Kern, FRCP, Dr. med. habil (Charité Berlin), Chair in Immunology, Brighton and Sussex Medical School, Brighton, UK, e-mail: f.kern@bsms.ac.uk

Brief profile/statement:

A member and supporter of ESCCA since its early days and specialist doctor/professor of clinical immunology, I have used flowcytometry in diagnostics and research since 1991. Early in my career I pioneered flow-based methods for characterising antigen-specific T-cells and have actively developed this area ever since. More recently, I have started working on extracellular vesicle (EV) detection by flow and have co-initiated pre-conference EV workshops for the 3rd consecutive year in 2025. In Nov 2024 I started the "V-ESCCA" EV Working Group and have chaired its 6 meetings since. Along with colleagues, I have organised and shaped the ESCCA conference's immunology track for 5 years. As board member I will work hard to continue strengthening ESCCA's role in clinical cytometry and EV analysis.
